(54) COMPUTER CARRYING BAG

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a computer carrying bag which does not require a computer to be taken out for using, and which is formed with a slide preventive means on the bag surface.

SOLUTION: The whole part is formed in a box shape using a waterproof material 2 having cushioning characteristics. By a slide fastener 3 crossing four side faces, the bag is made openable and closable at any arbitrary position. A slide preventive means is provided on the surface of a back side. Furthermore, at least two out of four inside corners are provided with a slip off preventive means 8. In this case, the waterproof material with cushioning characteristics is a urethane resin sheet, or the like. The slide preventive means on

the surface of the back side is another urethane sheet, or the like. The slip off preventive means elastic wide material, or the like diagonally cross corners.
